## NOTE

Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates a reference to a United Nations document.

### ***General disclaimer***

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Where the designations "economy" or "country or area" appear, they cover countries, territories or areas.

The designations "developing", "transition" and "developed" are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process.

The assignment of countries or areas to specific groupings is done for statistical convenience and does not imply any assumption regarding political or other affiliation of countries or territories by the United Nations.

Material in this publication may be freely quoted or reprinted, but acknowledgement is obligatory, together with a reference to the document number (TD/STAT.39).

La cote des documents de l'Organisation des Nations Unies se compose de lettres majuscules et de chiffres. La mention d'une telle cote indique qu'il est fait référence à un document de l'Organisation.

### ***Déni de responsabilité***

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent, de la part du secrétariat de l'Organisation des Nations Unies, aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

Les appellations «économie» ou «pays ou zone» désignent des pays, des territoires ou des zones.

Le recours aux appellations «en développement», «en transition» et «développés» ne représente qu'une commodité à des fins statistiques et n'exprime pas nécessairement un jugement quant au niveau atteint par un pays ou une zone donnés concernant le processus de développement.

La répartition des pays en groupes particuliers ne représente qu'une commodité à des fins statistiques et ne présume en aucune manière d'une quelconque affiliation politique ou autre de la part des pays ou des territoires.

Le contenu de la présente publication peut être cité ou reproduit sans autorisation, sous réserve qu'il soit fait mention de ladite publication et de sa cote (TD/STAT.39).

The **UNCTAD Handbook of Statistics** provides a collection of statistics and indicators relevant to the analysis of international trade, investment and development. Reliable statistical information is indispensable for formulating sound economic policies and recommendations that may commit countries for many years as they strive to integrate into the world economy and improve the living standards of their citizens. Whether it is for research, consultation or technical cooperation, UNCTAD needs reliable and internationally comparable trade, financial and macroeconomic data, covering several decades and as many countries as possible.

In addition to facilitating the work of the secretariat's economists, the **Handbook** provides all other users - policymakers, research specialists, academics, officials from national governments or international organizations, journalists, executive managers, members of non-governmental organizations - with the access to cross-comparable sets of data. The **Handbook** presents a consolidated, yet wide-ranging overview of the statistical series available at UNCTAD.

The publication is available in printed copy and DVD format. Moreover, the statistical series published in the **Handbook** are also available online at UNCTADstat (<http://unctadstat.unctad.org/wds>). Unlike the **Handbook**, which captures statistics at one point of time, UNCTADstat is continuously updated and enhanced, thus providing users with the latest available data. Consequently, the figures from the **Handbook** may not always correspond to UNCTADstat.

The paper copy of the **UNCTAD Handbook of Statistics 2014** has been streamlined and is shorter than the 2013 version. The number of country groupings presented has been reduced. However, all the groupings included in the previous editions are still available on the DVD and in UNCTADstat.

To help us provide better and more relevant statistics to users, you are invited to send your comments to [statistics@unctad.org](mailto:statistics@unctad.org).

Le **Manuel de statistiques de la CNUCED** fournit des statistiques et indicateurs essentiels à l'analyse du commerce international, de l'investissement et du développement. Une information statistique fiable est indispensable à la formulation de politiques économiques saines et de recommandations qui engageront les pays pour de longues années dans leur processus d'intégration dans l'économie mondiale et d'amélioration des conditions de leurs peuples. Que ce soit pour la recherche, la concertation ou la coopération technique, la CNUCED a besoin de données commerciales, financières et macroéconomiques fiables, comparables au niveau international et disponibles, si possible, sur plusieurs décennies et pour un maximum de pays.

En plus de faciliter les travaux des économistes du secrétariat, le **Manuel** fournit à tous les autres utilisateurs, décideurs, chercheurs, universitaires, fonctionnaires d'administrations nationales ou d'organisations internationales, journalistes, cadres d'entreprises ou membres d'organisations non gouvernementales, un accès à des données transversales comparables. Le **Manuel** présente un aperçu harmonisé des séries statistiques disponibles à la CNUCED.

Le **Manuel** est disponible en version imprimée et DVD. De plus, les données présentées sont disponibles en ligne, dans UNCTADstat (<http://unctadstat.unctad.org/wds>). À la différence du **Manuel** qui présente des statistiques figées à un moment donné, UNCTADstat est améliorée et actualisée régulièrement pour mettre à la disposition des utilisateurs les données les plus récentes. Par conséquent, les données du **Manuel** ne pourront être comparées systématiquement à UNCTADstat.

Le **Manuel de Statistiques de la CNUCED 2014** a été simplifié et réduit par rapport à la version précédente. Le nombre de groupements de pays présentés a été réduit. Cependant, tous les groupements qui étaient inclus dans les versions précédentes sont toujours disponibles dans le DVD et dans UNCTADstat.

Afin de mettre à disposition des utilisateurs des statistiques toujours plus pertinentes, nous vous invitons à nous faire part de vos commentaires en nous écrivant à [statistics@unctad.org](mailto:statistics@unctad.org).

Some exceptions are indicated in footnotes.

Les exceptions sont indiquées dans les notes en bas de page.

Unless otherwise specified, country aggregates are the sums of the relevant country data by group. Calculations of aggregates may include data estimated by the UNCTAD secretariat that are not necessarily all reported separately. When there are not enough representative reported or estimated data points within a country aggregate, no aggregation is undertaken and symbol (-) is assigned.

Because of rounding, details and percentages in tables do not necessarily add up to totals.

Data are checked to ensure that they match the geographical coverage of the countries, as described at the beginning of the **Handbook**. However, sometimes gaps cannot be avoided due to data unavailability. They are thus described in notes at the end of the table.

Unless otherwise stated, dollars (\$) refer to United States dollars and data in dollars are expressed in current United States dollars of the year to which they refer.

Average annual growth rates are defined as the coefficient  $b$  in the exponential trend function  $y = ae^{bt}$  where  $t$  stands for time. This method takes all observations in a period into account. Therefore, the resulting growth rates reflect trends that are not unduly influenced by exceptional values.

Sauf indication contraire, les agrégats de pays sont obtenus en sommant les données des pays composant le groupe. Les calculs d'agrégats peuvent inclure des données estimées par le secrétariat de la CNUCED qui ne sont pas nécessairement toutes rapportées séparément. Les agrégats ne sont calculés que lorsqu'il y a assez de données significatives, rapportées ou estimées. Dans le cas contraire, l'agrégation ne sera pas calculée et la valeur sera remplacée par le symbole (-).

Par ailleurs, la somme des chiffres et des pourcentages indiqués dans les tableaux ne correspond pas nécessairement aux totaux en raison des arrondis.

Les données sont collectées et vérifiées pour qu'elles correspondent à la couverture géographique des pays, telle qu'elle est décrite en début de **Manuel**. Toutefois certains écarts ne peuvent être parfois évités en raison de l'indisponibilité des données. Ils sont alors décrits dans les notes de fin de tableau.

Sauf indication contraire, le terme dollar (\$) s'entend du dollar des États-Unis d'Amérique et les données en dollars sont exprimées en dollars courants de l'année à laquelle elles se réfèrent.

Les taux moyens d'évolution annuelle sont définis par le coefficient  $b$  de la fonction exponentielle de tendance  $y = ae^{bt}$ , où  $t$  représente le temps. Cette méthode permet de prendre en compte toutes les observations concernant une période donnée sans que le taux de croissance obtenu ne soit trop affecté par des valeurs exceptionnelles.

## COMPOSITION OF COUNTRY GROUPINGS

The term "economies", as used in this publication, refers to regions, countries and territories. In case of change in the statistical coverage of a country, it is identified by adding an end year after the country name.

Every year, UNCTAD reviews and updates the definition and composition of country groupings. Such changes may impact significantly on the figures from one version to another. The modifications in the groupings are thoroughly outlined in the section Documentation at *UNCTADstat* website.

### Geographical distribution of developing, transition and developed economies

There is no established convention for the designation of "developing", "transition" and "developed" countries or areas in the United Nations system.

The World total represents the sum of the figures of the above three groups plus the figures of a group of "Other territories" not elsewhere classified. These territories are included in the world total if they have been reported but are not presented individually or in any group.

"Developing" and "developed" categories are further divided by geographical region.

The composition of the groupings is detailed below.

## DEVELOPING ECONOMIES

### AFRICA

#### **Eastern Africa**

Burundi; Comoros; Djibouti; Eritrea; Ethiopia; Kenya; Madagascar; Malawi; Mauritius; Mozambique; Rwanda; Seychelles; Somalia; South Sudan; Uganda; United Republic of Tanzania; Zambia, and Zimbabwe.

#### **Middle Africa**

## COMPOSITION DES GROUPEMENTS DE PAYS

Dans cette publication, le terme «économie» couvre les régions, les pays et les territoires. Une année ajoutée au nom d'un pays indique un changement de la couverture statistique de ce pays.

La CNUCED révise et met à jour la définition et la composition des groupements de pays chaque année. Ces changements peuvent affecter de manière significative les chiffres d'une année de publication à l'autre. Le détail des changements est disponible dans la rubrique Documentation sur le site web d'*UNCTADstat*.

### Répartition géographique des économies en développement, économies en transition et économies développées

La distinction entre pays ou régions "en développement", "en transition" et "développés", ne correspond à aucune nomenclature officielle à l'échelle du système des Nations Unies.

Le total Monde représente la somme des trois groupes ci-dessus plus les données d'un groupe "Autres territoires" non-classés ailleurs. Lorsqu'elles sont disponibles, les données de ces territoires sont incluses dans le total monde mais ne sont présentées ni individuellement ni dans aucun groupe.

Les économies en "développement" et "développées" sont elles-mêmes subdivisées suivant des critères géographiques.

La composition des groupements est détaillée ci-dessous.

- Partners not elsewhere specified: "Confidential information and differences", "Neutral zone", "Free zones" and "Bunkers". These specific partners are only used in the merchandise trade tables.

### MEMO ITEMS

Developing economies are presented at three levels of aggregation: the total group, the group excluding China (referring to continental China) and the group excluding the least developed countries.

Developing economies are also categorized into three subgroups according to their average 2004-2006 nominal GDP per capita: high-income (above \$4,500), middle-income (between \$1,000 and \$4,500) and low-income (below \$1,000).

The category, "Heavily indebted poor countries" includes those economies benefiting from the debt reduction initiative of the World Bank and the International Monetary Fund.

Since 1994, the United Nations has recognized the particular problems of the Small Island Developing States (SIDS). However, the UN never established criteria to determine an official list of SIDS. An unofficial list is used by UNCTAD for analytical purposes.

Least developed countries and landlocked developing countries are recognized by the United Nations as categories that require special attention from the international community.

### AUTRES TERRITOIRES

La composition du groupement "Autres territoires" est la suivante :

- Territoires non-classés ailleurs : Antarctique ; île Bouvet ; Territoire britannique de l'Antarctique ; Territoire britannique de l'océan Indien ; île Christmas ; îles des Cocos (Keeling) ; Terres australes et antarctiques françaises ; îles Heard et McDonald ; île Norfolk ; Pitcairn ; Saint-Barthélemy ; Saint-Martin (partie française) ; Géorgie du Sud et îles Sandwich méridionales ; îles mineures éloignées des États-Unis et îles du Pacifique sous administration des États-Unis.
- Partenaires non classés ailleurs : 'combustibles de soute et provisions de bord', 'informations confidentielles et différences', 'zone neutre', 'zones franches'. Ces partenaires sont utilisés exclusivement dans les tableaux du commerce de marchandises.

### POUR MÉMOIRE

Les économies en développement sont présentées à trois niveaux d'agrégation : le groupe dans son intégralité, puis sans la Chine continentale et enfin sans les pays les moins avancés.

Les économies en développement sont également réparties en trois groupes de revenu en fonction de la moyenne des années 2004-2006 du PIB nominal par habitant : revenu élevé (supérieur à 4 500 \$), intermédiaire (entre 1 000 \$ et 4 500 \$) et faible (inférieur à 1 000 \$).

Le groupe des pays pauvres très endettés inclut les pays bénéficiant de l'initiative de désendettement de la Banque mondiale et du Fonds monétaire international.

Depuis 1994, les Nations Unies ont également pris en compte les problèmes particuliers des petits États insulaires en développement. Cependant, l'ONU n'a jamais établi de critères en vue d'en établir une liste officielle. Une liste non officielle est utilisée par la CNUCED à des fins analytiques.

Pour l'ONU, les pays les moins avancés et les pays en développement sans littoral sont des groupes de pays qui requièrent une attention particulière de la communauté internationale.

## COMPOSITION OF COUNTRY GROUPINGS

### High-income developing economies (57)

American Samoa; Anguilla; Antigua and Barbuda; Argentina; Aruba; Bahamas; Bahrain; Barbados; Bonaire, Sint Eustatius and Saba; Botswana; Brazil; British Virgin Islands; Brunei Darussalam; Cayman Islands; Chile; Cook Islands; Costa Rica; Curaçao; Dominica; Equatorial Guinea; Falkland Islands (Malvinas); French Polynesia; Gabon; Grenada; Guam; Hong Kong, Special Administrative Region of China; Kuwait; Lebanon; Libya; Macao, Special Administrative Region of China; Malaysia; Mauritius; Mexico; Montserrat; New Caledonia; Niue; Northern Mariana Islands; Oman; Palau; Panama; Qatar; Republic of Korea; Saint Kitts and Nevis; Saint Lucia; Saint Vincent and the Grenadines; Saudi Arabia; Seychelles; Singapore; Sint Maarten (Dutch part); South Africa; Taiwan Province of China; Trinidad and Tobago; Turkey; Turks and Caicos Islands; United Arab Emirates; Uruguay, and Venezuela (Bolivarian Republic of).

### Middle-income developing economies (47)

Algeria; Angola; Belize; Bolivia (Plurinational State of); Bhutan; Cabo Verde; China; Colombia; Congo; Cuba; Dominican Republic; Ecuador; Egypt; El Salvador; Fiji; Guatemala; Guyana; Honduras; Indonesia; Iran (Islamic Republic of); Jamaica; Jordan; Kiribati; Maldives; Marshall Islands; Micronesia (Federated States of); Mongolia; Morocco; Namibia; Nauru; Paraguay; Peru; Philippines; Saint Helena; Samoa; Sri Lanka; State of Palestine; Suriname; Swaziland; Syrian Arab Republic; Thailand; Tokelau; Tonga; Tunisia; Tuvalu; Vanuatu, and Wallis and Futuna Islands.

### Low-income developing economies (55)

Afghanistan; Bangladesh; Benin; Burkina Faso; Burundi; Cambodia; Cameroon; Central African Republic; Chad; Comoros; Côte d'Ivoire; Democratic People's Republic of Korea; Democratic Republic of the Congo; Djibouti; Eritrea; Ethiopia; Gambia; Ghana; Guinea; Guinea-Bissau; Haiti; India; Iraq; Kenya; Lao People's Democratic Republic; Lesotho; Liberia; Madagascar; Malawi; Mali; Mauritania; Mozambique; Myanmar; Nepal; Nicaragua; Niger; Nigeria; Pakistan; Papua New Guinea; Rwanda; Sao Tome and Principe; Senegal; Sierra Leone; Solomon Islands; Somalia; South Sudan; Sudan; Timor-Leste; Togo; Uganda; United Republic of Tanzania; Viet Nam; Yemen; Zambia, and Zimbabwe.

### Heavily indebted poor countries (IMF) - HIPC (39)

The tables included in this book represent analytical summaries of the full time-series contained in the DVD version of the **UNCTAD Handbook of Statistics 2014**.

The **Handbook** refers to the Standard International Trade Classification (SITC) Revision 3 detailed in the DVD. Depending on the table, nomenclature of statistics is detailed at the 3-digit level or by broad product groupings as follows:

Codes	SITC Product groupings
0 - 9	All products
0 + 1 + 22 + 4	All food items
2 minus (22 + 27 + 28)	Agricultural raw materials
27 + 28 + 68 + 667 + 971	Ores, metals, precious stones and non-monetary gold
3	Fuels
5 + 6 + 7+ 8 minus (667 + 68)	Manufactured goods:
5	- Chemical products
7	- Machinery and transport equipment
6 + 8 minus (667 + 68)	- Other manufactured goods

## PART ONE

### International merchandise trade

Table 1.1 shows the value of total exports (FOB - Free On Board) and imports (CIF - Cost, Insurance and Freight), expressed in millions of dollars and percentages of the world total, of individual countries, geographical regions and selected economic groupings. The trade flows shown in this table are on the General Trade System basis for all countries except those marked with an asterisk which employ the Special Trade System. The General Trade System is used when the statistical territory of a compiling country coincides with its economic territory. Consequently, imports include all goods entering the economic territory of a compiling country and exports include all goods leaving the economic territory of the compiling country. The Special Trade System is used when the statistical territory comprises only a particular part of the economic territory within which "goods may be disposed of without customs restriction". In such a case, imports include all goods entering the free circulation area of the compiling country, which means cleared through customs for home use, and exports include all goods leaving the free circulation area of a compiling country.

Average annual growth rates of international trade derived from table 1.1 are presented in table 1.2.

Table 1.3 contains trade balances (exports FOB minus imports CIF). Balances are expressed as a percentage of imports.

Table 1.4 shows the relative importance of trade among group members as compared to the regional or total trade of that group.

## PART TWO

### International merchandise trade by region

Table 2.1 shows the export and import structure of individual countries by main regions of origin and destination. Data are presented for as many individual countries as possible, while trade partners are grouped in 14 major clusters.

Table 2.2 (A to J) presents the structure of exports by destination and imports by origin by major commodity groups for 10 selected country groups. The table provides detailed information on the world trade network for 19 regions of origin and destination and six commodity groups.

Les tableaux inclus dans cette publication constituent un résumé analytique des séries chronologiques complètes publiées dans le DVD du **Manuel de statistiques de la CNUCED 2014**.

Le **Manuel** se réfère à la Classification type pour le commerce international (CTCI) révision 3 détaillée dans le DVD. Selon les tableaux, les statistiques sont présentées, au niveau détaillé de la nomenclature (position à trois chiffres) ou par groupements de produits dont la composition est la suivante :

### Groupements de produits CTCI

Total tous produits
Produits alimentaires
Matières premières d'origine agricole
Minéraux, métaux, pierres précieuses et or à usage non monétaire
Combustibles
Articles manufacturés :
- Produits chimiques
- Machines et matériel de transport
- Articles manufacturés divers

## PREMIÈRE PARTIE

### Commerce international des marchandises

Le tableau 1.1 donne la valeur des exportations (FAB - franco à bord) et des importations (CAF - coût, assurance et fret) totales de marchandises, exprimée en millions de dollars et en pourcentage du monde, des pays et régions géographiques et d'une sélection de groupements économiques. Les flux du commerce présentés dans ce tableau se réfèrent au système du commerce général pour tous les pays, à l'exception de ceux qui utilisent le système du commerce spécial, identifiés par un astérisque. Le système du commerce général est utilisé lorsque le territoire statistique d'un pays coïncide avec son territoire économique, et en conséquence, les importations comprennent tous les biens admis sur le territoire du pays déclarant et les exportations tous les biens qui le quittent. Le système du commerce spécial est utilisé lorsque le territoire statistique ne comprend qu'une partie du territoire économique à l'intérieur de laquelle « les biens peuvent être écoulés librement sans restriction douanière ». Dans ce cas, les importations comprennent tous les biens qui entrent dans la zone de libre circulation du pays déclarant, c'est-à-dire qui ont été dédouanés pour mise à la consommation et les exportations comprennent tous les biens qui quittent la zone de libre circulation du pays déclarant.

Les taux d'évolution annuels moyens du commerce international des marchandises, calculés à partir des valeurs des tableaux 1.1, figurent dans le tableau 1.2.

Le tableau 1.3 présente les balances commerciales (exportations FAB moins importations CAF), ainsi que ces mêmes balances en pourcentage des importations.

Le tableau 1.4 indique l'importance des échanges entre pays membres de groupements commerciaux par rapport aux exportations régionales et totales de ces groupements.

## DEUXIÈME PARTIE

### Commerce international des marchandises par régions

Le tableau 2.1 présente la structure des exportations et des importations des pays par régions de destination et d'origine. Le plus grand nombre possible de pays en développement sont inclus tandis que les partenaires commerciaux sont regroupés en 14 groupes.

Les tableaux 2.2 (A à J) indiquent la structure des exportations par destination ainsi que des importations par origine et par principaux groupes de produits pour le monde et une sélection de 10 groupements de pays. Le tableau fournit une information détaillée sur le réseau du commerce mondial pour 19 régions d'origine et de destination, et six groupes de produits.

Totals of international merchandise trade presented in the tables in Part one of the *Handbook* are not strictly comparable with those in Part two and three. Discrepancies arise due to the use of different complementary sources and treatment of unallocated residual trade flows.

Exports by destination may differ considerably in some cases from data on imports for a variety of factors, among which the following may be of particular importance:

- Most import data are reported on a CIF rather than a FOB basis;
- There is a time lag between the date on which goods are recorded as exports and their arrival at their destination;
- There may be considerable differences between the recorded destination of exports and the actual destination as shown in import statistics;
- Margins of exports and imports may not be allocated across commodity groups in the same way;
- The use of different product nomenclatures by the exporting and importing countries.

The main source for data shown in this chapter and in tables 3.1 and 3.2 is the *UN COMTRADE* database. These data should be used with good knowledge of the coverage and the limitations of the main data source available at <http://comtrade.un.org/db/help/uReadMeFirst.aspx>.

Les totaux du commerce international des marchandises présentés dans les tableaux de la première partie ne sont pas strictement comparables à ceux des deuxième et troisième parties. Ces écarts sont dus à l'utilisation de sources complémentaires différentes et d'une marge d'exportations et d'importations non distribuées.

Les exportations ventilées par destinations peuvent accuser un écart parfois considérable par rapport aux importations en raison de divers facteurs dont les plus importants sont les suivants :

- Les importations sont déclarées en principe sur la base de la valeur CAF plutôt que sur la base de la valeur FAB ;
- Les importations de marchandises peuvent arriver à destination et être enregistrées longtemps après la date de leur enregistrement à l'exportation ;
- D'importantes différences peuvent exister entre la destination des exportations déclarée par les pays exportateurs et la destination réelle telle qu'indiquée dans les statistiques d'importation ;
- La répartition des marges d'exportations et d'importations entre les groupes de produits peut aussi différer ;
- L'utilisation de nomenclatures de produits différentes par le pays exportateur et le pays importateur.

La base de données *ONU COMTRADE* est la source principale des données présentées dans ce chapitre et dans les tableaux 3.1 et 3.2. Ces données doivent être utilisées en étant pleinement conscient de la couverture et des limitations de la source de données, disponibles à l'adresse suivante : <http://comtrade.un.org/db/help/uReadMeFirst.aspx>.

### PART THREE

#### International merchandise trade by product

Table 3.1 shows the structure of exports and imports for individual economies by nine commodity groups (total, all food items, agricultural raw materials, fuels, ores and metals, manufactured goods, including chemical products, machinery and transport equipment and other manufactured goods) for selected years.

Table 3.2 (A, B and C, respectively) presents the structure of exports for the world, for developing and developed economies, by product, at the SITC Revision 3, 3-digit level. Each product share of world exports is calculated for each economic grouping as well as the average annual growth rate and the latter's deviation from the world growth rate.

Table 3.2D establishes for each economy the list of main products exported (SITC group, Revision 3, 3-digit level). Each product's share of total exports for individual countries, geographical regions and the world is also indicated.

Table 3.2E lists major exporters of 70 leading products among developing economies at the SITC Revision 3, 3-digit level as well as corresponding shares in world trade.

Table 3.3 provides concentration indices and structural change indices for exports and imports by product group (SITC, Revision 3, 3-digit level). The first indicator shows whether a product market is concentrated in a few countries or more homogeneously distributed among several countries. The structural change indicator shows whether the market share for a given product among export countries has changed significantly when compared with a reference year.

### TROISIÈME PARTIE

#### Commerce international des marchandises par produits

Le tableau 3.1 fournit la structure des exportations et des importations des pays par produits classés en neuf groupes (total, produits alimentaires, matières premières d'origine agricole, combustibles, minéraux et métaux, produits manufacturés, dont produits chimiques, machines et matériel de transport, articles manufacturés divers) pour plusieurs années.

Les tableaux 3.2A, B et C présentent respectivement les exportations par produits du monde, des économies en développement et développées, au niveau de la CTCI révision 3 (position à trois chiffres). Les parts que représente chaque produit dans les exportations du monde et de la région, sont calculées pour chaque groupe d'économies, ainsi que le taux annuel de croissance et l'écart de ce dernier par rapport au taux de croissance mondial.

Le tableau 3.2D établit, pour chaque économie, la liste des principaux produits (CTCI révision 3, position à trois chiffres) qu'elle exporte. La part de chaque produit dans le total des exportations du pays, de la région et du monde est également indiquée.

Le tableau 3.2E liste les plus gros exportateurs de 70 produits parmi les produits de la CTCI révision 3 (position à trois chiffres) les plus exportés par les économies en développement, ainsi que les parts correspondantes dans le commerce mondial.

Le tableau 3.3 fournit les indices de concentration et de changements structurels des exportations et des importations des produits au niveau de la CTCI révision 3 (position à trois chiffres). Le premier indicateur montre comment le marché d'un produit est concentré sur quelques pays ou réparti de façon plus homogène entre les pays. L'indicateur de changement structurel indique si la répartition du commerce d'un produit entre les pays exportateurs ou importateurs a connu une évolution importante par rapport à une année de référence.

**PART FOUR****International merchandise trade indicators**

Table 4.1 includes concentration and diversification indices. The concentration index specifically shows how exports and imports of individual countries or country groupings are concentrated on several products or otherwise distributed in a more homogeneous manner among a series of products. The diversification index indicates whether the structure of exports or imports by product of a given country or country grouping differs from the world patterns.

Table 4.2 contains export and import volume indices, rounding out trade value available in tables 1.1 and 1.2. Export and import unit value indices, derived terms of trade and purchasing power of exports indices are also provided.

To improve data coverage, especially for the latest periods, the following procedure was used in the calculation of unit value indices:

- A set of average price indices at the SITC Revision 3, 3-digit level are constructed using *UNCTADstat* Commodity Price Statistics, international and national sources and UNCTAD secretariat estimates.
- At the country level, unit value indices are calculated using current year trade values (available from table 3.2) as weights at the SITC Revision 3, 3-digit level.

In some instances these indices may differ from the estimates published in official sources, since the main aim of the *Handbook* is to provide tentative estimates for most developing countries on a comparable basis.

Table 4.3 presents average applied import most favoured nation (MFN) tariff rates for major categories of non-agricultural and non-fuel products by individual markets.

**PART FIVE****International trade in services**

Table 5.1 presents exports and imports of total trade in services by individual country, geographical region and selected economic groupings. The statistics shown correspond to IMF *Balance of Payments Manual* (BPM5, 1993) definitions and are jointly compiled by UNCTAD and the World Trade Organization (WTO). The aggregate data from table 5.1 include estimates of missing values that are not shown separately. Services are defined as the economic output of intangible commodities that may be produced, transferred and consumed at the same time. However, services cover a heterogeneous range of intangible products and activities that are difficult to capture within a single definition and are sometimes hard to separate from goods. Services are generally hard to measure as they are produced and consumed simultaneously.

Table 5.2 presents statistics on international trade in services by category of service for selected country groups and for major individual economy exporters and importers among developing and transition economies, as well as for developed countries. Similar to table 5.1, the data adhere to IMF *Balance of Payments Manual* (BPM5, 1993) definitions and are jointly compiled by UNCTAD and the WTO. The following services categories are included: transport, travel, communication, construction, computer and information services, insurance, financial services, royalties and licence fees, other business services, and personal, cultural and recreational services.

**QUATRIÈME PARTIE****Indicateurs du commerce international des marchandises**

Le tableau 4.1 contient les indices de concentration et de diversification. L'indice de concentration montre comment les exportations et importations d'un pays ou groupe de pays sont concentrées sur quelques produits ou réparties de façon plus homogène sur une gamme de produits. L'indice de diversification indique si la structure par produits des exportations ou importations d'un pays ou groupe de pays diverge de la structure par produits observée au niveau du monde.

Le tableau 4.2 fournit les indices de volume des exportations et des importations complétant ainsi l'information en valeur disponible dans les tableaux 1.1 et 1.2. Les indices de la valeur unitaire des exportations et importations, les indices dérivés des termes de l'échange et du pouvoir d'achat des exportations sont également inclus.

Afin d'améliorer la couverture des données et spécialement pour les années récentes, la méthode suivante a été utilisée pour le calcul des valeurs unitaires :

- Un ensemble d'indices de prix moyens au niveau de la CTCI révision 3 (position à trois chiffres) a été construit en utilisant des données provenant de *UNCTADstat* Statistiques des prix des produits de base, des sources internationales et nationales ainsi que des estimations du secrétariat de la CNUCED.
- Au niveau des pays individuels, les indices de la valeur unitaire sont calculés en utilisant, comme pondération, les valeurs des exportations et des importations de l'année courante disponibles dans la table 3.2 au niveau de la CTCI révision 3 (position à trois chiffres).

Dans certains cas, ces indices peuvent différer des estimations publiées dans les sources officielles, le but principal du *Manuel* étant de fournir des estimations provisoires et comparables pour la plupart des pays en développement.

Le tableau 4.3 contient les données sur les droits de douane NPF (nation la plus favorisée) moyens appliqués à l'importation des principales catégories de produits non-agricoles et non-pétroliers, par marchés individuels.

**CINQUIÈME PARTIE****Commerce international des services**

Le tableau 5.1 présente les exportations et les importations totales des services par pays, par régions géographiques et pour une sélection de groupements économiques. Les statistiques comprises sont le résultat d'un travail commun entre la CNUCED et l'Organisation mondiale du commerce (OMC) et elles correspondent aux définitions du *Manuel de la balance des paiements* du FMI (MBP5, 1993). Les agrégats inclus dans le tableau 5.1 comprennent les valeurs estimées qui ne sont pas présentées séparément. Les services sont définis comme rendements économiques de produits intangibles qui peuvent être produits, transférés et consommés au même moment. Cependant, les services recouvrent un groupe large et hétérogène de produits et d'activités que l'on peut difficilement englober dans une définition. Parfois, la démarcation entre services et marchandises n'est pas aisée.

Le tableau 5.2 présente les statistiques sur le commerce international des services par catégories de services pour une sélection de groupements de pays, ainsi que pour les principaux exportateurs et importateurs parmi les économies en développement et en transition, et parmi les pays développés. Ces statistiques sont le résultat d'un travail commun entre la CNUCED et l'OMC et elles correspondent aux définitions du *Manuel de la balance des paiements* du FMI (MBP5, 1993). Le tableau présente des données pour les catégories de services suivantes : les transports ; les voyages ; les services de communications ; les services du bâtiment et des travaux publics ; les services informatiques et d'information ; les services d'assurance ; les services financiers ; les redevances et droits de licence ; les autres services aux entreprises ; et les services personnels, culturels et relatifs aux loisirs.

Table 5.3 describes international maritime transport. It contains data on the size of the world merchant fleet by flag of registration and by type of ship, region and economy. The table incorporates a consolidated time series from several issues of the *UNCTAD Review of Maritime Transport*. The Review reports on the worldwide evolution of shipping, sea-ports and multimodal transport of liquid bulk, dry bulk and container traffic.

## PART SIX Commodities

Table 6.1 includes the annual and quarterly free-market price indices in current dollars for selected commodities exported by developing economies. Price indices are also available for aggregated primary commodity groups such as food, tropical beverages, vegetable oilseeds and oils, agricultural raw materials and minerals, ores and metals. A combined price index in current dollars is also available. Weights of the aggregated price indices are based on the value of exports of developing countries from 1999 to 2001 and the base year is 2000 (2000=100).

## PART SEVEN International finance

Table 7.1 presents values of the current account (net) in millions of dollars and as percentages of GDP. Balance of payments current account data cover all transactions between residents and non-residents of a reporting economy. In general, the current account balance describes the difference between current receipts and expenditures for internationally traded goods, services and income payments. From a national perspective, the current account balance shows the gap between national savings and domestic investment.

Table 7.2 contains information on foreign direct investment (FDI) inflows and outflows. These figures correspond to the Statistical Annexes of the *UNCTAD World Investment Report 2014*. FDI is defined as an investment involving a long-term relationship and reflecting a lasting interest in and control by a resident entity in one economy (foreign direct investor or parent enterprise) of an enterprise resident in a different economy (FDI enterprise or affiliate enterprise or foreign affiliate). Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates. A direct investment enterprise is defined as an incorporated or unincorporated enterprise in which the direct investor, resident in another economy, owns 10 percent or more of the ordinary shares or voting power (or the equivalent).

Table 7.3 presents values of receipts (credits) of personal remittances in millions of dollars. They also show personal remittances receipts as percentage of GDP and international trade

Table 7.4 includes data on payments (debits) of personal remittances, based on the same approach used for table 7.3.

## PART EIGHT GDP and population

Table 8.1 provides information on nominal gross domestic product (GDP), total and per capita. The GDP per capita in dollars are derived from data provided in national currencies converted into dollars using prevailing official exchange rates.

Le tableau 5.3 concerne le transport maritime international. Il contient des données sur la flotte marchande mondiale par pavillons d'immatriculation et par types de navires, par régions et par économies. Le tableau englobe les informations consolidées provenant des différentes éditions de la publication *Review of Maritime Transport* de la CNUCED qui rend compte de l'évolution du transport multimodal, portuaire et maritime concernant les principaux trafics de vrac liquide, de vrac sec et de conteneurs.

## SIXIÈME PARTIE Produits de base

Le tableau 6.1 présente les indices annuels et trimestriels de prix en dollars courants sur le marché libre d'une sélection de produits de base exportés par les économies en développement. Ces indices sont aussi disponibles au niveau des groupes de produits de base suivants : produits alimentaires, boissons tropicales, huiles et graines oléagineuses, matières premières d'origine agricole, minéraux, minéraux et métaux. Un indice de l'ensemble en dollars courants est également disponible. Les pondérations des indices ont été calculées à partir de la valeur des exportations des pays en développement de 1999 à 2001 et l'année de base est l'année 2000 (2000=100).

## SEPTIÈME PARTIE Finance internationale

Le tableau 7.1 fournit les valeurs de compte courant (net) en millions de dollars et en pourcentage du produit intérieur brut. Le compte des transactions courantes de la balance des paiements recouvre toutes les transactions entre entités résidentes et non-résidentes de l'économie déclarante. En général, la balance du compte courant indique la différence entre les recettes et les paiements pour les biens, les services et les revenus faisant partie des transactions internationales. D'une perspective nationale, la balance du compte courant montre l'écart entre les épargnes nationales et l'investissement intérieur.

Le tableau 7.2 est consacré aux investissements directs en provenance de l'étranger (IED), flux entrants et sortants. Les chiffres correspondent aux données contenues dans l'Annexe statistique du *Rapport sur l'investissement dans le monde 2014* de la CNUCED. L'investissement étranger direct (IED) est un investissement impliquant une relation à long terme et témoignant de l'intérêt durable d'une entité résidant dans un pays (investisseur étranger direct ou société mère) à l'égard d'une entreprise résidant dans un autre pays (entreprise bénéficiaire, entreprise affiliée, ou encore filiale étrangère). Cet investissement englobe à la fois la transaction initiale entre les deux entités et toutes les transactions ultérieures entre elles et entre filiales étrangères, qu'elles soient constituées ou non en sociétés. L'entreprise d'investissement direct est définie comme une entreprise dotée ou non de la personnalité morale, dans laquelle un investisseur direct qui est résident d'une autre économie détient au moins 10 pour cent des actions ordinaires ou des droits de vote (ou l'équivalent).

Le tableau 7.3 fournit les informations sur les recettes (crédits) des envois de fonds personnels en millions de dollars. Ces données sont également communiquées en pourcentage du PIB et du commerce international.

Le tableau 7.4 présente les statistiques sur les paiements (débits) des envois de fonds personnels, suivant la même approche utilisée dans le tableau 7.3.

## HUITIÈME PARTIE PIB et population

Le tableau 8.1 fournit le produit intérieur brut (PIB) nominal total et par habitant. Les données du PIB par habitant en dollars ont été obtenues à partir des valeurs de PIB exprimées à l'origine en monnaies nationales, converties en dollars, en appliquant les taux de change officiels en vigueur.

Conversion of these series, originally expressed in national currency into dollars through the use of official exchange rates, is not always satisfactory owing to the deviation of the official exchange rate from purchasing power parities. For this reason, the data presented in this table are subject to certain distortions and should be used only as an approximation.

Table 8.2 contains annual average growth rates for total and per capita real GDP. The growth rates are based on GDP at constant 2005 prices in dollars.

Table 8.3 provides data on GDP by type of expenditure and kind of economic activity.

Table 8.4 provides total population estimates. The figures for groups may be different from those published by the UNDESA Population Division where UNCTAD country groupings composition differs.

Il n'est pas toujours satisfaisant de ramener la valeur de séries de ce type, exprimée à l'origine en monnaies nationales, à une devise commune, le dollar, en appliquant les taux de change officiels, ces taux ne coïncidant pas avec les parités réelles de pouvoir d'achat. C'est pourquoi les données de ce tableau, relatives au PIB par habitant, ne sont pas exemptes de certaines distorsions et ne peuvent donc servir qu'à donner une idée approximative des ordres de grandeur relatifs.

Les taux annuels moyens de variation du PIB réel total et du PIB réel par habitant sont disponibles dans les tableaux 8.2. Les taux de croissance se basent, quant à eux, sur le PIB aux prix constants en dollars de l'année 2005.

Le PIB total est décomposé par catégories de dépenses et par branches d'activité économique dans le tableau 8.3.

Le tableau 8.4 présente des estimations sur la population totale. Les chiffres pour les groupes peuvent être différents de ceux publiés par la Division de la population de l'ONU DAES lorsque la composition des groupements de la CNUCED est différente.

UNCTAD secretariat calculations, based on UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

- (1) The symbol \*\* indicates the grouping to which the country belongs and to which the percentage share shown applies. The percentage represents a country's export share in the total exports of the commodity of the group to which the country belongs (i.e. "developing" or "developed" or "transition" economies).
- (2) Data are estimated at least for one of the reference years.

Source :

Calculs du secrétariat de la CNUCED, basés sur la matrice du commerce de marchandises d'*UNCTADstat* de la CNUCED

Notes :

- (1) Le symbole \*\* indique le regroupement auquel le pays appartient et par rapport auquel est calculé le pourcentage. Ce pourcentage est la part que représentent les exportations du produit par le pays par rapport aux exportations du même produit par le regroupement auquel le pays appartient (économies "en développement" ou "développées" ou "en transition").
- (2) Données estimées pour au moins une des années de référence.

### 3.2.E Export structure by product

### 3.3 Concentration and structural change indices of product markets

Source:

UNCTAD secretariat calculations, based on UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

(1) Concentration index:

The Herfindahl-Hirschmann index is a measure of the degree of market concentration. It has been normalized to obtain values ranking from 0 to 1 (maximum concentration), according to the following formula:

$$H_i = \frac{\sqrt{\sum_{j=1}^n (\frac{x_{ij}}{X_i})^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

where

$H_i$  = Value of concentration index for product i

$x_{ij}$  = Value of exports or imports for country j and product i

$$X_i = \sum_{j=1}^n x_{ij}$$

and

n = maximum number of individual economies

An index value that is close to 1 indicates a very concentrated market. On the contrary, values closer to 0 reflect a more equal distribution of market shares among exporters or importers.

(2) Structural change index:

This index, ranging from 0 to 1 reveals the structural change in trade for a particular product as compared to the reference year (1995 = 0).

An index value close to 1 indicates a significant change in the composition of exporters or importers. On the contrary, values closer to 0 would demonstrate a higher degree of "traditionality" in the markets over the period concerned.

The value is calculated as follows:

$$I_i = \frac{\sum_{j=1}^n |S_{ij}^1 - S_{ij}^0|}{2}$$

where

$I_i$  = Value of structure index for product i

$S_{ij}^0$  = Share of trade of product i for country j in 1995

$S_{ij}^1$  = Share of trade of product i for the country j in the concerned year

### 3.3 Indices de concentration et de changement structurel des marchés de produits

Source :

Calculs du secrétariat de la CNUCED, basés sur la matrice du commerce de marchandises de *UNCTADstat* de la CNUCED

Notes :

(1) Indice de concentration :

L'indice Herfindahl-Hirschmann mesure le degré de concentration des marchés.

Il a été normalisé afin d'obtenir des valeurs comprises entre 0 et 1 (concentration maximale), d'après la formule suivante :

$$H_i = \frac{\sqrt{\sum_{j=1}^n (\frac{x_{ij}}{X_i})^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

où

$H_i$  = Valeur de l'indice de concentration pour le produit i

$x_{ij}$  = Valeur des exportations ou des importations du pays j pour le produit i

$$X_i = \sum_{j=1}^n x_{ij}$$

et

n = nombre maximum d'économies individuelles

Un indice proche de 1 indique une concentration très forte du marché pour ce produit en particulier. En revanche, une valeur proche de 0 démontre une répartition plus homogène du commerce entre les exportateurs ou les importateurs.

(2) Indice de changement structurel :

Cet indice, dont la valeur est comprise entre 0 et 1, représente les changements de structure du commerce par rapport à une année de référence (1995 = 0).

Une valeur proche de 1 indique un important changement structurel du commerce de ce produit, c'est à dire une grande variation des parts de marché au sein des exportateurs ou importateurs, par rapport à l'année de référence. Plus la valeur de l'indice est proche de 0, plus la structure du commerce de ce produit est stable.

Il est calculé comme suit :

$$I_i = \frac{\sum_{j=1}^n |S_{ij}^1 - S_{ij}^0|}{2}$$

où

$I_i$  = Valeur de l'indice de changement structurel, pour le produit i

$S_{ij}^0$  = Part du commerce du produit i pour le pays j par rapport au commerce total de ce produit pour l'année 1995

$S_{ij}^1$  = Part du commerce du produit i pour le pays j, par rapport au commerce total de ce produit pour l'année concernée

UNCTAD secretariat calculations, based on UNCTAD, *UNCTADstat* Merchandise Trade Matrix

Notes:

(a) More than 30% of total trade under SITC Rev.3, code 931: "Special transactions & commodities not classified"

- (1) Number of products exported (or imported) at the three-digit SITC, Rev. 3 level; this figure includes only those products that are greater than \$100,000 or more than 0.3 per cent of the country's total exports (or imports).
- (2) The diversification index signals whether the structure of exports or imports by product of a given country or group of countries differ from that of the world. This index that ranges from 0 to 1 reveals the extent of the differences between the structure of trade of the country or country group and the world average. The index value closer to 1 indicates a bigger difference from the world average.

Diversification index is computed by measuring absolute deviation of the country share from world structure, as follows:

$$S_j = \frac{\sum_i |h_{ij} - h_i|}{2}$$

where

$h_{ij}$  = share of product i in total exports or imports of country or country group j

$h_i$  = share of product i in total world exports or imports.

This index is a modified Finger-Kreinin measure of similarity in trade. For more information, please consult the article of Finger, J. M. and M. E. Kreinin (1979), "A measure of 'export similarity' and its possible uses" in the *Economic Journal*, 89: 905-12.

- (3) Concentration index, also named Herfindahl-Hirschmann index, is a measure of the degree of market concentration. It has been normalized to obtain values ranking from 0 to 1 (maximum concentration), according to the following formula:

$$H_j = \frac{\sqrt{\sum_{i=1}^n \left( \frac{x_{ij}}{X_j} \right)^2} - \sqrt{1/n}}{1 - \sqrt{1/n}}$$

where

$H_j$  = country or country group index

$X_{ij}$  = value of exports for country j and product i

$$X_j = \sum_{i=1}^n x_{ij}$$

and

n = number of products (SITC Revision 3 at 3-digit group level)

Calculs du secrétariat de la CNUCED, basés sur la matrice du commerce de marchandises de *UNCTADstat* de la CNUCED

Notes :

(a) Plus de 30% du commerce sous la position 931 de la CTCI rév. 3 : "Transactions et articles spéciaux non classés"

(1) Nombre de produits au niveau de groupes de la CTCI (rév. 3, position à 3 chiffres) exportés (ou importés) par chaque pays ; cependant, seuls les produits ayant une valeur supérieure à 100.000 dollars ou comptant pour plus de 0,3 % des exportations (ou des importations) totales du pays sont inclus.

(2) L'indice de diversification indique si la structure par produits des exportations d'un pays ou groupe de pays diverge peu ou beaucoup de la structure par produits du monde. Cet indice dont la valeur est comprise entre de 0 à 1, révèle l'ampleur des différences entre la structure des échanges d'un pays ou du groupe de pays et la moyenne mondiale. Plus l'indice est proche de 1, plus la divergence est forte.

L'indice de diversification mesure la déviation absolue de la structure du pays par rapport à la structure mondiale comme ci-dessous :

$$S_j = \frac{\sum_i |h_{ij} - h_i|}{2}$$

où

$h_{ij}$  = part du produit  $i$  dans le total des exportations (ou importations) du pays  $j$

$h_i$  = part du produit  $i$  dans le total des exportations (ou importations) mondiales.

Cet indice est une variante de l'indicateur de Finger-Kreinin sur la similarité de la structure du commerce. Pour plus d'information, veuillez consulter l'article de Finger, J. M. et M. E. Kreinin (1979), "A measure of 'export similarity' and its possible uses", dans *The Economic Journal*, 89: 905-12.

(3) L'indice de concentration, aussi appelé indice de Herfindahl-Hirschmann, mesure le degré de concentration des marchés. Il a été normalisé afin d'obtenir des valeurs comprises entre 0 et 1 (concentration maximale), d'après la formule suivante :

$$H_j = \frac{\sqrt{\sum_{i=1}^n \left( \frac{x_{ij}}{X_j} \right)^2} - \sqrt{1/n}}{1 - \sqrt{1/n}}$$

où

$H_j$  = Indice du pays ou groupe de pays

$x_{ij}$  = valeur des exportations du pays  $j$  pour le produit  $i$

$$X_j = \sum_{i=1}^n x_{ij}$$

et

$n$  = nombre de produits (de la CTCI Révision 3, position à 3 chiffres)

Notes:

- (1) Unit value index: To improve data coverage, the following procedure was used in the calculation of unit value indices:
  - A set of average price indices at SITC (Revision 3, 3-digit) group level was constructed using UNCTAD, *Commodity Price Statistics*, international and national sources and UNCTAD secretariat estimates.
  - At the country level, unit value indices were calculated using current year's trade values at the SITC 3-digit level, available in table 3.2 as weights.

In some instances these indices may differ from the estimates published in official sources, since the main aim is to provide tentative estimates for most countries on a comparable basis.
- (2) From 2011 onwards, exports include commercial mining.
- (3) From 2005 onwards, including customs free zones.

Notes :

(1) Indice de la valeur unitaire : afin d'améliorer la couverture des données, la méthode suivante a été utilisée pour le calcul des valeurs unitaires :

- Un ensemble d'indices de prix moyens au niveau des groupes de la CTCI (révision 3, position à 3 chiffres) a été construit en utilisant des données de CNUCED, *Statistiques des prix des produits de base*, des sources internationales et nationales ainsi que des estimations du secrétariat de la CNUCED.

- Au niveau des pays individuels, les indices de la valeur unitaire ont été calculés en utilisant les valeurs des exportations et des importations de l'année courante, disponibles dans la table 3.2, comme pondération.

Dans certains cas ces indices peuvent différer des estimations publiées dans les sources officielles, le but principal étant de fournir des estimations approximatives et comparables pour la plupart des pays.

(2) À partir de 2011, les exportations comprennent l'exploitation minière commerciale.

(3) À partir de 2005, y compris les zones franches douanières.

Notes :

(1) Le terme de l'échange, appelé aussi "troc net", est le rapport de l'indice de la valeur unitaire des exportations à l'indice de la valeur unitaire des importations exprimé en pourcentage.

(2) Le pouvoir d'achat des exportations est l'indice de la valeur des exportations corrigé par l'indice de la valeur unitaire des importations.

(3) À partir de 2011, les exportations comprennent l'exploitation minière commerciale.

(4) À partir de 2005, y compris les zones franches douanières.

#### **4.3 Average applied import MFN tariff rates on non-agricultural and non-fuel products**

Source:  
UNCTAD TRAINS/WITS

Notes:

- This table presents tariff data for selected years only. For the complete information, please refer to the *Handbook 2014* DVD.
- (1) Product categories are defined in terms of SITC Revision 3, and all corresponding Harmonized System (HS) 6-digit codes have been aggregated for each category.
- (2) Simple average for each product group calculated from simple average at HS 6-digit level.
- (3) Weighted average for each product group calculated from simple average at HS 6-digit level. Country's own imports at HS 6-digit level for corresponding years are used as weights. Where imports are not reported, mirror imports have been compiled using exports of partner countries.
- (4) From 2008 onwards, member of the European Union.
- (5) From 2004 onwards, member of the European Union.
- (6) For the Union, data refer to the composition of the group during that year.

#### **4.3 Droits de douane moyens NPF appliqués à l'importation des produits non-agricoles et non-pétroliers**

Source :  
CNUCED TRAINS/WITS

Notes :

- Ce tableau présente les tarifs pour une sélection d'années seulement. La série complète est disponible dans le DVD du *Manuel 2014*.
- (1) Les catégories de produits sont définies sur la base de la CTCI, révision 3, et pour chaque catégorie, les codes à 6 chiffres du Système harmonisé (SH) correspondants ont été agrégés.
- (2) Moyenne arithmétique simple, pour chaque catégorie de produits, calculée à partir des moyennes arithmétiques simples au niveau du code à 6 chiffres du SH.
- (3) Moyenne arithmétique pondérée, pour chaque catégorie de produits, calculée à partir des moyennes simples au niveau du code à 6 chiffres du SH. Pour chaque année, les coefficients de pondération sont les importations de chaque marché au niveau du code à 6 chiffres du SH. Lorsque les importations n'étaient pas disponibles, elles ont été évaluées par les données miroir basées sur les exportations des pays partenaires.
- (4) À partir de 2008, membre de l'Union européenne.
- (5) À partir de 2004, membre de l'Union européenne.
- (6) Pour une année donnée, les tarifs de l'Union se réfèrent à la composition du groupe durant cette année.

## 5.2 Exports and imports of services by service category

## 5.2 Exportations et importations des services par catégories de services

### Sources:

UNCTAD and WTO secretariats' calculations, based on:

- IMF, *Balance of Payments Statistics*
- Eurostat, online database
- UN DESA Statistics Division, *UN Service Trade Statistics Database*
- OECD, *OECD.Stat*
- Other international and national sources

### Notes:

- The statistics presented correspond to the concepts and definitions from the IMF *Balance of Payments Manual*, fifth edition (*BPM5*, 1993). For those countries and territories who present their figures according to the Sixth edition of the *Manual* (*BPM6*, 2009), data were adjusted to fit the *BPM5* concepts.

Estimated data for individual countries are included in geographical regions or economic groupings calculation, but not always shown separately. When possible, the values missing in principal international sources are estimated by using the growth rates derived from the data available in national or other international sources.

UNCTAD and WTO may use different definitions for certain country groups ("developed" and "developing" economies, for example). Consequently, some aggregates will be different, although the individual-country underlying data are the same.

Individual economies are ranked based on both reported and estimated 2012 figures. Non-pUBLISHABLE estimates are indicated by a - sign.

(a) Refers to Belgium-Luxembourg Economic Union.

(1) Covers all transportation services that involve carriage of passengers, movement of goods (freight), rentals with crew, and related supporting services. Excludes freight insurance, which is included with insurance services. Excludes goods procured in ports by non-resident carriers and repairs on transport equipment, which are included in goods.

(2) Includes goods and services acquired from an economy by non-resident travellers during visits shorter than one year.

(3) Consists of postal, courier and telecommunications services between residents and non-residents.

(4) Covers the work performed on construction projects and installations by an enterprise outside the economy of residence of that enterprise.

(5) (1) Computer services consist of hardware and software-related services and data-processing.

(2) Information services are divided into news agency services and other information services. New agency services include the provision of news, photographs and feature articles to the media. Other information services cover database services: database conception, data storage and dissemination of data. Direct non-bulk subscriptions to periodicals regardless of means of information transmission also belong to this service category.

(6) Covers all types of insurance, reinsurance and related auxiliary services. Insurance services are estimated or valued by the service charges included in total premiums rather than by total value of the premiums. Negative insurance services exports would indicate that the claims payable to non-residents were higher than the premiums earned from non-residents' insurance payments.

(7) Includes financial intermediation and auxiliary services, except those directly related to life insurance and pension funds (covered under insurance services).

(8) Covers franchising fees, royalties paid for the use of registered trade marks, and other fees paid for authorised use of intangible, non-produced non-financial assets and proprietary rights. Distributive rights with limitations for audiovisual products are not included here.

(9) Includes merchanting and other trade-related services; operational leasing services; and miscellaneous business, professional and technical services (legal, advertising, consulting, accounting, R&D, etc.)

(10) (1) Audiovisual and related services cover the production of motion pictures, video and radio programmes, musical recordings, (and similar) including fees paid to personnel involved. Related limited distribution rights are also covered. Fees paid for sporting, theatrical and similar events belong to this category as well.

(2) Other personal cultural and recreational services encompass services associated with museums, libraries, archives, and other cultural and sporting activities. Education and health services are covered under this category (excluding, however, the expenses for health and education services paid by travellers, which belong to travel services).

Calculs des secrétariats de la CNUCED et de l'OMC sur la base de :

- FMI, *Statistiques de la balance des paiements*
- Eurostat, base de données en ligne
- ONU DAES Division des statistiques, *ONU Service Trade Statistics Database*
- OCDE, *OECD.Stat*
- Autres sources internationales et nationales

### Notes :

- Les statistiques présentées correspondent aux concepts et définitions du *Manuel de la balance des paiements* du FMI, cinquième édition (*BPM5*, 1993). Pour les pays et territoires qui présentent leur statistiques conformément à la Sixième édition du *Manuel* (*BPM6*, 2009), les données ont été ajustées selon les concepts du *BPM5*.

Les valeurs estimées pour les pays individuels sont comprises dans les calculs des groupements géographiques ou régionaux, mais elles ne sont pas toujours présentées séparément. Lorsque c'est possible, les données manquantes dans les sources principales sont estimées en utilisant les taux d'évolution dérivés des données disponibles dans les sources nationales ou autres sources internationales.

La composition de groupements de pays peut être différente pour la CNUCED et l'OMC ("pays en développement" et "pays développés", par exemple). Par conséquent, certains agrégats seront différents bien que les données des pays individuels soient les mêmes.

Les économies individuelles sont classées en fonction des données rapportées et estimées de l'année 2012. Les estimations qui ne sont pas publiables sont indiquées par le signe -.

(a) Se réfère à l'Union économique belgo-luxembourgeoise.

(1) Recouvre tous les services de transport de passagers, l'acheminement des marchandises (fret), la location de moyens de transports avec leur équipage et les services annexes qui s'y rapportent. L'assurance du fret n'est pas comprise. Elle fait partie des services d'assurance. Les achats effectués dans les ports par les transporteurs non résidents, ainsi que les réparations du matériel de transport ne sont pas compris. Ils sont classés dans les biens.

(2) Comprend les biens et services acquis dans une économie par les voyageurs non-résidents au cours d'un séjour inférieur à un an.

(3) Englobe les services postaux (y compris les messageries) et les services de télécommunication, entre résidents et non-résidents.

(4) Recouvre les travaux de construction et d'installation par une entreprise en dehors de l'économie dans laquelle l'entreprise est résidente.

(5) (1) Les services informatiques englobent les services liés aux matériels et logiciels informatiques et les services de traitement de données.

(2) Les services d'information sont composés des services d'agence de presse et des autres services d'information. Les services d'agence de presse incluent la communication d'informations, de photographies et d'articles de fond aux médias. Les autres services d'information couvrent les services concernant les bases de données : leur conception, le stockage et la diffusion des données. Les abonnements directs individuels aux périodiques font partie de cette catégorie de services.

(6) Comprend diverses formes d'assurances, réassurances et services auxiliaires connexes. Ces services sont évalués ou estimés au montant des frais de service inclus dans le total des primes perçues, et non au montant total des primes proprement dites. Les valeurs négatives des exportations des services d'assurance signifient que les primes à recevoir des non-résidents sont plus faibles que les indemnités de dédommagements à payer aux non-résidents.

(7) Comprend les services d'intermédiation financière et les services auxiliaires, à l'exception de ceux directement liés à l'assurance-vie ou aux fonds de pension (déjà compris dans les services d'assurance).

(8) Recouvre les redevances de franchises et les redevances payées pour l'utilisation des marques déposées, ainsi que les autres redevances et droits de licence liés à l'utilisation légale d'actifs intangibles non produits non financiers et de droits de propriété. Les droits de distribution limitée des produits audiovisuels ne sont pas compris dans cette catégorie.

(9) Y compris le négoce international et les autres services liés au commerce, la location-exploitation et divers services aux entreprises, spécialisés et techniques (juridiques, comptabilité, conseil, publicité, R&D, etc.).

(10) (1) Les services audiovisuels et connexes sont attachés à la production de films cinématographiques, d'émissions de radio et de télévision, d'enregistrements musicaux (et similaires). Les cachets versés au personnel impliqué et les droits limités de distributions figurent également dans cette catégorie, ainsi que les paiements liés aux événements sportifs, théâtraux et spectacles divers.

(2) Les autres services personnels, culturels et relatifs aux loisirs englobent les services associés aux musées, bibliothèques, archives et autres activités culturelles et sportives. Les services d'éducation et de santé figurent aussi dans cette catégorie. Cependant, ne sont pas comprises les dépenses liées à l'éducation ou à la santé encourues par des voyageurs (et qui figurent sous la catégorie 'voyages').

Notes:

- Balance of payments current account data cover all transactions between residents and non-residents of a reporting economy, involving economic values and mainly concerning goods, services, income and current transfers. In general, the current account balance describes the difference between current receipts and expenditures for internationally traded goods, services and income payments. At the same time, from a national perspective, the current account balance would equal the gap between national savings and domestic investment.

- Sources nationales

Notes :

- Les données du compte des transactions courantes de la balance des paiements recouvrent toutes les transactions, entre entités résidentes et non-résidentes, portant sur des valeurs économiques, concernant notamment les biens, les services, les revenus et les transferts courants. En général, la balance du compte courant indique la différence entre les recettes et les paiements pour les biens, les services et les revenus faisant partie des transactions internationales. De même, d'une perspective nationale, la balance du compte courant représente l'écart entre les épargnes nationales et l'investissement intérieur.

## 7.2 Foreign direct investment: Inward and outward flows

Source:  
UNCTAD, *FDI/TNC database*

Notes:

- Foreign direct investment (FDI) is defined as an investment involving a long-term relationship and reflecting a lasting interest in and control by a resident entity in one economy (foreign direct investor or parent enterprise) of an enterprise resident in a different economy (FDI enterprise or affiliate enterprise or foreign affiliate). Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates.

FDI inflows and outflows comprise capital provided (either directly or through other related enterprises) by a foreign direct investor to a FDI enterprise, or capital received by a foreign direct investor from a FDI enterprise. FDI includes the three following components: equity capital, reinvested earnings and intra-company loans. Data on FDI flows are presented on net bases (capital transactions' credits less debits between direct investors and their foreign affiliates). Net decreases in assets or net increases in liabilities are recorded as credits, while net increases in assets or net decreases in liabilities are recorded as debits. Hence, FDI flows with a negative sign indicate that at least one of the three components of FDI is negative and not offset by positive amounts of the remaining components. These are called reverse investment or disinvestment.

(1) FDI outflows data from 1988 to 1991 inclusive refer to Slovenia only; the inflows figures for those years also cover the other Republics of the former SFR Yugoslavia.

(2) Partial data; total USSR territory is not covered.

(3) Data from 1970 to 2001 inclusive refer to Belgium-Luxembourg Economic Union; from 2002 onwards data cover Belgium only.

Notes :

- L'investissement étranger direct (IED) est un investissement impliquant une relation à long terme et témoignant de l'intérêt durable d'une entité résidant dans un pays (investisseur étranger direct ou société mère) à l'égard d'une entreprise résidant dans un autre pays (entreprise bénéficiaire, entreprise affiliée, ou encore filiale étrangère). Cet investissement englobe à la fois la transaction initiale entre les deux entités et toutes les transactions ultérieures entre elles et entre filiales étrangères.

Les flux entrants et sortants de l'IED comprennent les capitaux fournis par l'investisseur direct (soit directement, soit par l'intermédiaire d'autres entreprises avec lesquelles il est lié) à l'entreprise d'investissement direct ou les capitaux reçus de cette entreprise par l'investisseur. L'IED est composé des trois catégories suivantes : le capital social, les bénéfices réinvestis et les emprunts intra-compagnie. Les données sur l'IED se présentent sur une base nette (les crédits moins les débits des transactions en capital entre l'investisseur direct et son entreprise apparentée). Les augmentations nettes en passifs et les décroissances nettes en actifs se déclarent comme crédits, tandis que les augmentations nettes en actifs et les décroissances nettes en passifs se déclarent comme débits. Les flux de l'IED précédés d'un signe négatif indiquent qu'au moins une des trois catégories de l'IED est négative et n'est pas contrebalancée par les valeurs positives des autres catégories. Il s'agit alors de désinvestissements ou de réductions d'investissement.

(1) Les données de l'IED sortant, de 1988 à 1991, couvrent seulement la Slovénie ; pour la même période, les flux entrants comprennent aussi d'autres Républiques de l'ex Yougoslavie (RSF).

(2) Données partielles : elles ne couvrent pas la totalité de territoire de l'URSS.

(3) Les données de 1970 à 2001 se réfèrent à l'Union économique belgo-luxembourgeoise; à partir de 2002 les données couvrent uniquement la Belgique.

UNCTAD secretariat calculations, based on:

- World Bank, *Migration and Remittances*

Notes:

- The World Bank defines the series as follows:
  - From 1980 to 2004, data are the sum of three items defined in the fifth edition of the *Balance of Payments Manual* of IMF: workers' remittances, compensation of employees and migrants' transfers.
  - From 2005 data are the sum of two items defined in the sixth edition of the *Balance of Payments and International Investment Position Manual* of IMF: personal transfers and compensation of employees.

- (a) Data for more than half of the countries in this group are missing
- (1) GDP data source: UNCTAD secretariat calculations, based on UN DESA Statistics Division, *National Accounts Main Aggregates Database*
- (2) Exports of goods and services data are based on *UNCTADstat* Exports and imports of goods and services

- Banque mondiale, *Migration and Remittances*

Notes :

- La Banque mondiale définit la série comme suit :
  - De 1980 à 2004, les données sont la somme de trois éléments définis dans la cinquième édition du *Manuel de la balance des paiements* du FMI : les envois de fonds des travailleurs, la rémunération des salariés et les transferts des migrants.
  - À partir de 2005, les données sont la somme de deux éléments définis dans la sixième édition du *Manuel de la balance des paiements et de la position extérieure globale* du FMI : les transferts personnels et la rémunération des salariés.

(a) Les données manquent pour plus de la moitié des pays de ce groupe

UNCTAD secretariat calculations, based on:

- World Bank, *Migration and Remittances*

- The World Bank defines the series as follows:

- From 1980 to 2004, data are the sum of three items defined in the fifth edition of the *Balance of Payments Manual* of IMF: workers' remittances, compensation of employees and migrants' transfers.
- From 2005 data are the sum of two items defined in the sixth edition of the *Balance of Payments and International Investment Position Manual* of IMF: personal transfers and compensation of employees.

(a) Data for more than half of the countries in this group are missing

(1) GDP data source: UNCTAD secretariat calculations, based on UN DESA Statistics Division, *National Accounts Main Aggregates Database*

(2) Exports of goods and services data are based on *UNCTADstat* Exports and imports of goods and services

Notes:

- Data in this table are shown as percentage of GDP / VA at current prices in US Dollars.
  - For countries' notes on GDP / VA breakdown, see:  
<http://unstats.un.org/unsd/snaama/downloads/Download-GDPcurrent-USD-countries.xls>
- (1) The breakdown in shares by type of expenditure is shown as percentage of GDP. The breakdown in shares of GDP might not add-up to 100 percent due to statistical discrepancies.  
(2) The breakdown in shares by kind of economic activity is shown as percentage of total value added.  
(3) Includes agriculture, hunting, forestry and fishing (ISIC Revision 3 divisions 01-05).  
(4) Includes mining and quarrying, manufacturing, electricity, gas and water supply, and construction (ISIC Revision 3 divisions 10-45).  
(5) Include all other economic activities (ISIC Revision 3 divisions 50-99).  
(6) Including Western Sahara.

Notes :

- Les données de ce tableau sont indiquées en pourcentage du PIB / VA aux prix courants en dollars des États-Unis.
  - Pour les notes des pays sur la ventilation du PIB / VA, se référer à :  
<http://unstats.un.org/unsd/snaama/downloads/Download-GDPcurrent-USD-countries.xls>
- (1) La ventilation par catégories de dépense est calculée en pourcentage du PIB. La somme des pourcentages du PIB ventilé peut ne pas être égale à 100 à cause des écarts statistiques.  
(2) La ventilation par branches d'activité économique est calculée en pourcentage de la valeur ajoutée totale.  
(3) Inclut l'agriculture, la chasse, la sylviculture et la pêche (CITI Révision 3 divisions 01-05).  
(4) Inclut les activités extractives, les activités de fabrication, la production et distribution d'électricité, de gaz et d'eau et la construction (CITI Révision 3 divisions 10-45).  
(5) Incluent toutes les autres activités économiques (CITI Révision 3 divisions 50-99).  
(6) Y compris le Sahara occidental.
